

## User Manual

1. To Charge: Push the switch to OFF and insert USB into a Computer's USB Port or USB Adapter to charge up. The flashing Red light will change to Blue to indicate that it's fully charged.
2. To Record: Push the switch to ON (Red Light Flashes) and the recording will start once the light turns off. Slide the switch to OFF (Red Light Flashes) to stop and save the file.
3. To Play: Insert the recorder into the USB port of your computer or laptop. Locate the "VOICE" drive and navigate

to your .WAV files. If your computer cannot play the files, we recommend downloading VLC Player for free from [videolan.org](http://videolan.org).

4. You can also use this device like a regular flash drive: simply drag and drop any kind of file from your desktop onto the drive.

Note: We recommend opening the cover of the USB at an angle for easier opening

8GB Unit: Aprox. 96hrs Recording Time

90mAh Rechargeable Battery: Aprox 8hrs Runtime
