

Set Tyre Pressure

Press "R" to switch the unit, press "+", "-" to increase or decrease the value, wait a few seconds after setting. When the number stops flashing, turn on the inflation switch and start working. When the air pressure reaches the specified level, the pump will stop automatically, please turn off the switch.

Air Nozzle Set

For different products

Advantages

1. Hand-held air pump for easier operation.
2. Three operation buttons, precise digital readout.
3. Metal cylinder body, fast heat dissipation and long service life.
4. Fast air refill and low noise when working.
5. LED light, more convenient to use at night.
6. Preset tire pressure, automatic filling and stopping.

Warning

1. Please fully charge before use.
2. Please lock the safety catch when it is not in use to avoid activation.
3. Do not disassemble the product without permission.
4. Do not place near a heat source, such as the exhaust port of a car.
5. The normal operation of the product will cause the product to heat up slightly, which is normal.
6. To ensure that the pump works well, the continuous filling time should not be too long, if you need to run for a long time, take intermittent breaks.
7. If the product is not used after starting, the power will be automatically cut off after 40 seconds.
