

Mighty Thirsty™
MOP

Includes: Mop, Mop head, manual, How to use insert.

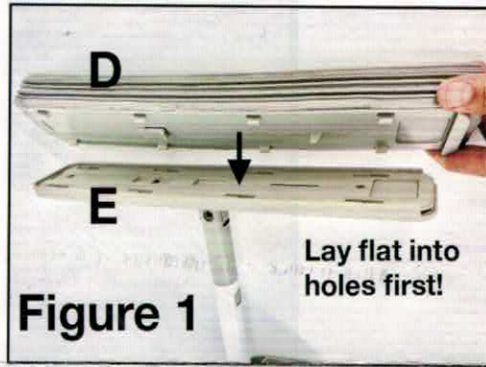

Figure 1

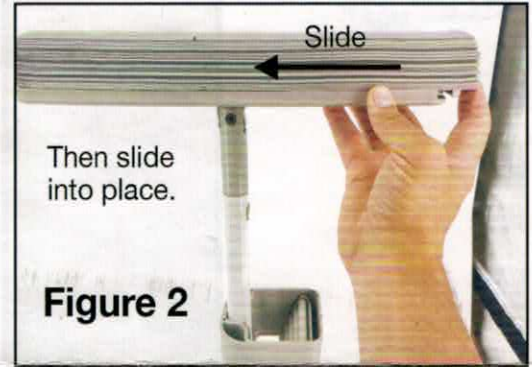

Figure 2

How to assemble your Mighty Thirsty™ Mop.

1. Unpack your box carefully and locate all the parts included.
2. Locate part **A** and screw into part **B**, then screw part **B** into part **C**.
3. Locate one mop head **D** and remove from bag. Your mop head may arrive soft and slightly wet. Line up tabs on bottom of mop head **D** with mop plate **E** making sure **ALL tabs are inserted into corresponding holes**. See figure 1. **DO NOT MISS ANY TABS!!**
4. Once mop head **D** is laying **completely FLAT** on top of mop plate **E**, slide mop head **D** into place until you hear it "**CLICK**". Make sure **ALL** tabs on bottom of mop head **D** are locked into place. Slide mop head **D** pushing from the end as seen in figure 2 makes this easier!

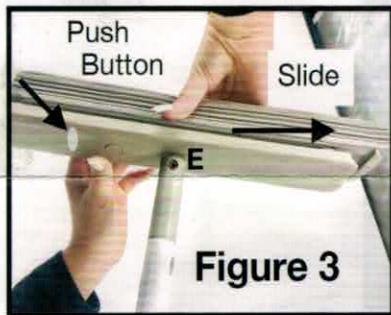

Figure 3

How to REMOVE your Mighty Thirsty™ Mop Head.

1. Locate release button on mop plate **E**.
2. While pushing button slide mop head **D** off in the direction AWAY from the the button.

See figure 3

Figure 4

How to Use your Mighty Thirsty™ Mop.

1. Hold mop handle as shown in figure 4 to slide mop head through wringer. (**MOP HEAD MUST BE SOFT**)
2. Once mop head is through wringer, move mop head 90 degrees into "T" position. See figure 5.
3. Fill a bucket with warm/hot water OR rinse in your sink.
4. Saturate mop head until completely soft. Hot water works BEST!
5. Wring out water as stated in step 1.
6. Move mop along floor cleaning dirt and debris.

Mighty Thirsty™
MOP

How to use your mop

Step 1: Put mop in the "T" position, keeping the mop head on the floor. Make sure the "wringer" (box on the handle) is facing towards you. **PLEASE MAKE SURE THE MOP HEAD IS SOFT** (using warm/hot water) **OR THIS WILL NOT WORK.** Mop must be soft all the way through with no hard spots.

Step 2: Angle handle to the floor on the side where the wringer is. When you hear the mop "click", lift up mop from floor. Mop will become vertical. **DO NOT TRY WITH YOUR HANDS.** Mop must be on the floor.

Step 3: As stated in previous step, when you hear mop "click", lift up mop from floor. Mop will become vertical. (as seen in picture above)

Step 4: Turn mop around and wring off dirt. **PLEASE MAKE SURE THE MOP HEAD IS SOFT** (using warm/hot water) **OR THIS WILL NOT WORK.** Mop must be soft all the way through with no hard spots.

*****VERY IMPORTANT TIPS ABOUT YOUR MOP HEAD *****

Your Mop Head **MAY** arrive to you **HARD** and **RIGID** (or soft and slightly damp). You **MUST** wet and soften completely before installing or using. Soak with **WARM** or **HOT** water to soften. Make sure it is soft **ALL THE WAY THROUGH**. Feel and squeeze the center of the sponge to make sure it is soft even in the center of the sponge. **REPEAT: Even in the center of the sponge MUST be soft or you cannot wring it out!!**

—>> IF YOU FEEL ANY HARD PARTS, CONTINUE TO SOAK AND SOFTEN BEFORE YOU USE. <<—

When your sponge is completely soft and wet, it will puff up a little and become straight and flexible. When your mop head dries, it will become hard and bend a little. This is OK because it will straighten out again after you soak it again.

REMEMBER, YOUR MOP HEAD WILL STRAIGHTEN OUT AND BECOME FLEXIBLE WHEN SATURATED. DO NOT ATTEMPT TO INSTALL MOP HEAD UNTIL COMPLETELY SOFT AND WET!!
