- LED span life: 50,000hrs.
- Solar charging time: 6-8 hrs.
- Dusk to dawn auto ON/OFF function
- Solar panel life: Over 5 years

HOW THE LIGHT WORKS

The solar panel on the top converts sunlight into electricity and recharges internal battery.

On the solar panel there is a internal photo sensitive control switch, which allows the light to automatically turn on at night.

After daybreak the light will automatically turn off and enter into charging mode.
