Model: PA-V2

Getting Started

- Plug the PA-V2 power adapter into your car's cigarette lighter outlet or connect to car's battery.
- Power up the PA-V2 by toggling the 'On/Off' switch to 'On', indicator become green.
- Power requirements of things you plug into the PA-V2 should not exceed 150W. Choose battery clamp when power required exceeds 150W.
- Plug in your electrical appliance or USB Device.

Caution

- This product is only for DC 12V outlets, please DO NOT use with DC 24V outlets.
- It's normal for the inverter to become warm during use.
- Choose cigarette lighter plug if the power required by your electrical appliance is less than 150W.
- Exceeding 80% capacity during long sessions of continuous usage is not recommended.
- Please plug in the PA-V2 after starting your car to avoid potential harm to connected devices.
- Indicator light will turn red if PA-V2 experiences power overload.

FAQ

Will the PA-V2 drain my car battery? Does my car need to be running to use this?

Battery drain rate while your car is powered off will depend on how much power you are pulling through the PA-V2 during usage. Running your car's engine while using the PA-V2 is recommended, but not required. During sustained continuous usage, it is possible for the PA-V2 to drain your car's battery if your car is not turned on.
